

# Philipp Zettl

---

*Backend Engineer*

## Professional Summary

Result oriented Backend Engineer with 4+ experience designing, developing and deploying scalable web backends using Python, FastAPI/Django and (non) relational or vector database systems. Skilled in SDLC from requirement gathering to automated testing and expertise in technical leadership, mentoring junior developers, and driving engineering best practices. Successfully architected a message processing system that parses and routes messages in parallel within  $\approx 1.1$  seconds. Passionate about writing open, clean, maintainable code and optimizing system performance.
